

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

The 1<sup>st</sup> and 3<sup>d</sup> Columns, shew the Times; the 2<sup>d</sup> and 4<sup>th</sup>, the Kinds. Thus, on the 5<sup>th</sup> of *January*, at 7 Minutes after 11 in the Evening, there will be an Emerfion of the first *Satellite*. Again, on the 26<sup>th</sup> of *December*, at 49 Minutes after 2 in the Morning, the fourth *Satellite* will immerge into the Shadow; and at 12 Minutes after 6 the same Morning, it will emerge out of it.
